

Intermediate Care

INTERMEDIATE CARE

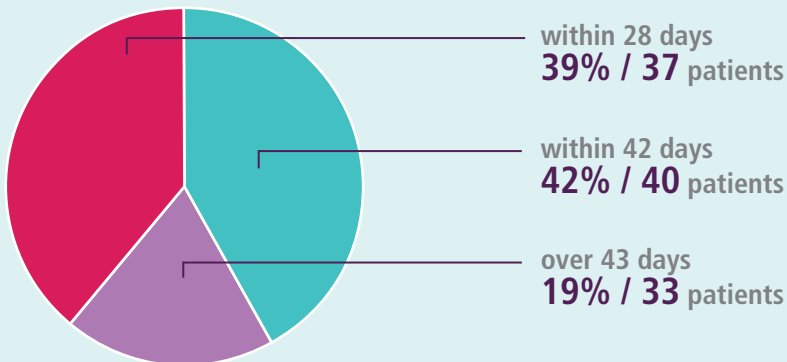

Since 2017 the Federation has provided clinical leadership and GP support to deliver enhanced care in care homes.

In 2020-21, we provided this support to 12 beds in Wilfred Geere House. During this time:

- 95 patients were admitted
- We carried out patient-centred geriatric assessments upon admission
- We followed a multi-disciplinary approach that enable joined-up care for patients, meaning:
 - 63% of patients with dementia were able to return to their homes
 - Medication reviews enabled prescribing cost reductions
- We partnered with the Age UK (Bolton) Home from Hospital Team to follow patients who were discharged to their homes.
- Our access to the GP record enabled better continued care, reviewing previous baselines, diagnosis and treatments.
